

IN THE CLAIMS

RECEIVED

JAN 21 1999

Group 2700

(1) [Please add new Claim 21 as follows:]

1 21. The method as recited in claim 6, wherein the wrapping step further
2 comprises the step of wrapping the read only file with code headers and records in order
3 to appear to an operating system loader as the executable code.

(2) [Please add new Claim 22 as follows:]

1 22. The data processing system as recited in claim 12, wherein the wrapping
2 circuitry wraps the read only file with code headers and records in order to cause an
3 operating system loader to treat the read only file as the executable code.

(3) [Please add new Claim 23 as follows:]

1 23. The computer program tool as recited in claim 18, wherein the program
2 code for wrapping wraps the read only file with code headers and records so that this
3 program code now is treated by an operating system loader as the executable code.

REMARKS

Claims 1-20 are pending in the Application.

Claims 1-20 stand rejected.

New Claims 21-23 have been added.

I. ABSTRACT

The Examiner has objected to the Abstract requesting that the Abstract should be amended to better summarize the inventive function or the "result" achieved. The Examiner believes that the "result" achieved is that a large database may be
